

# Toilet paper

T

hat's all, Folks! To some the time we spent with the coronavirus around may feel like an eternity, but this semester that has been deeply shaped by it is coming to an end. We (the "Fachschaft") wish you all the best for the coming exams! Remember to keep a safe distance from others and that you can currently withdraw from an exam until the end of it. (You can find more information here [1]). Enjoy the holidays! See you back in the new lecture period, maybe even in person.

## Registration for next term

Don't forget that you can only register for the winter term until **8<sup>th</sup> of July**. You can find more information on the online platform MeinCampus at [www.campus.uni-erlangen.de](http://www.campus.uni-erlangen.de).

## Game nights

We'll meet again. I know where. I know when. Doesn't matter if it's not some sunny day. Cause the place to meet up will be our Discord server [2]. On the **14<sup>th</sup> of August**, **8<sup>th</sup> of September** and the **1<sup>st</sup> of October** and **27<sup>th</sup> of October** we'll host our internationally famous game nights starting at **6 pm**. We're still working on how to download snacks, drinks and pizza, so for now you'll have to organise them for yourself.

## Elite Graduate Program

Remember, that the application deadline for the Elite Graduate Program in Physics is set in August. More current information can be found here [3].

## Award for extraordinary commitment in teaching

The last term was filled with novelties and challenges. Many of those, at least in matters of university, were within the area of teaching – which is already filled with oh so many challenges, one does not want to start counting them all. And many people have done or still do a great job to provide us with great lectures, exercises and lab courses. This is why, for quite some time now, we honour teachers, tutors and supervisors who put in effort for their courses beyond the usual with the Award for extraordinary commitment in teaching. So if you had a tutor, supervisor or lecturer in this summer term or past winter term who has shown this extraordinary commitment in teaching and really tried their absolute best to help you, then we would ask you kindly to suggest them for this award. Just insert the name and a short text of recommendation in the form in [5] until **30<sup>th</sup> of September** and maybe this person will be quite happy in the near future.

## University elections 2020

Another year, another round of university elections! Due to current circumstances, the election will take place with all-postal voting this year. The FAU will send the ballot papers to one of the addresses that is currently listed on your IdM profile and you can send back your marked ballots free of charge. They'll have to reach the electoral office until the **14<sup>th</sup> of July, 3 pm** or else they'll count as a spoilt vote.

## Election advertisement: Diverse "FSI" list in the faculty of natural sciences

### Who we are

The Diverse "FSI"-list in the election regarding the election of faculty representation and faculty council is a non-partisan group of students from the six different "FSI" groups at the faculty of natural sciences. Unlike the political groups, we only approach concrete political positions carefully. Each of our candidates brings their own experiences, goals and concrete policy ideas to the table. You can find them in their respective profiles on our Instagram account [4].

### Why you should vote for us

The departments at the faculty of natural sciences are currently facing many challenges, from the difficult financial state to new problems arising from the current situation. We fight against study conditions getting worse because of this and for good teaching and learning being central to any decision within university planning. In the process, we want to improve the legal groundwork of the study programs as well as their infrastructural equipment. Since our members have worked in the different bodies of the departments as student representatives, we have a lot of experiences in dealing with professors and the structures in the departments. We are well connected and know who to contact when.
