

# Toilet paper

The biggest difference between spherical and real cows may be that the latter are much harder to push around. Depending on the source, this would require at least two to five people. But even then, the project should be abandoned, as there are far more enjoyable activities for two to five people. That's why we have compiled a list for you of other events worth visiting - in addition to a visit to the Erlanger Bergkirchweih.

## Faculty Dinner

It's a departmental dinner? It's a games night? No, it's a Faculty Dinner! On **Thursday, 09.06** from 6 p.m., the FSI Maths/Physics/DS, with help from the three departments, invites you to a joint meal behind the mathematics building. Students, lecturers and staff are cordially invited to get to know each other and get closer over Asian noodles and crêpes. For the rest of the evening, we have a variety of outdoor and indoor games ready, in the hope of deepening the relationship between the teaching and learning bodies.

## Game nights

For all those who would like to participate in a sport but have too few rabbits for Kaninhop, too few balls for Quidditch and too little stamina for most other sports. And of course for everyone else. Feel free to join our next game nights and enjoy the benefits of sedentary sports as well as many other games with us! The next game nights are on **Tuesday, 21.06**, **Tuesday, 14.07**, **Tuesday, 26.07** and **Tuesday, 11.08** in the maths practice rooms. As always, there will also be a joint pizza order. We are looking forward to seeing you!

## Mathematics colloquium

After presenting the physics colloquium on the last toilet paper, we would like to present some equivalent delicacies from mathematics and data science this time. The next lectures are:

- 15.06, 12.30-1.30 p.m.**, H13 Prof. Roland Speicher, Univ. des Saarlands, tba
- 01.07, 3.15-4.15 p.m.**, H12 Prof. A. Jüngel, Taming cross-diffusion systems with entropy methods
- 01.07, 4.45-5.45 p.m.**, H12 Prof. Dr. M. Cicalese, tba
- 20.07, 12.30-1.30 p.m.**, H13 Ass. Prof. G. de Nittis, The magnetic spectral triple: applications and open questions

You can find detailed information about other colloquia of the departments, especially the weekly physics colloquium on Wednesdays at 12 o'clock, on the websites of the departments.

## Hiking (Together with the FSI Chemistry/MoWi and Biology/ILS/LAG)

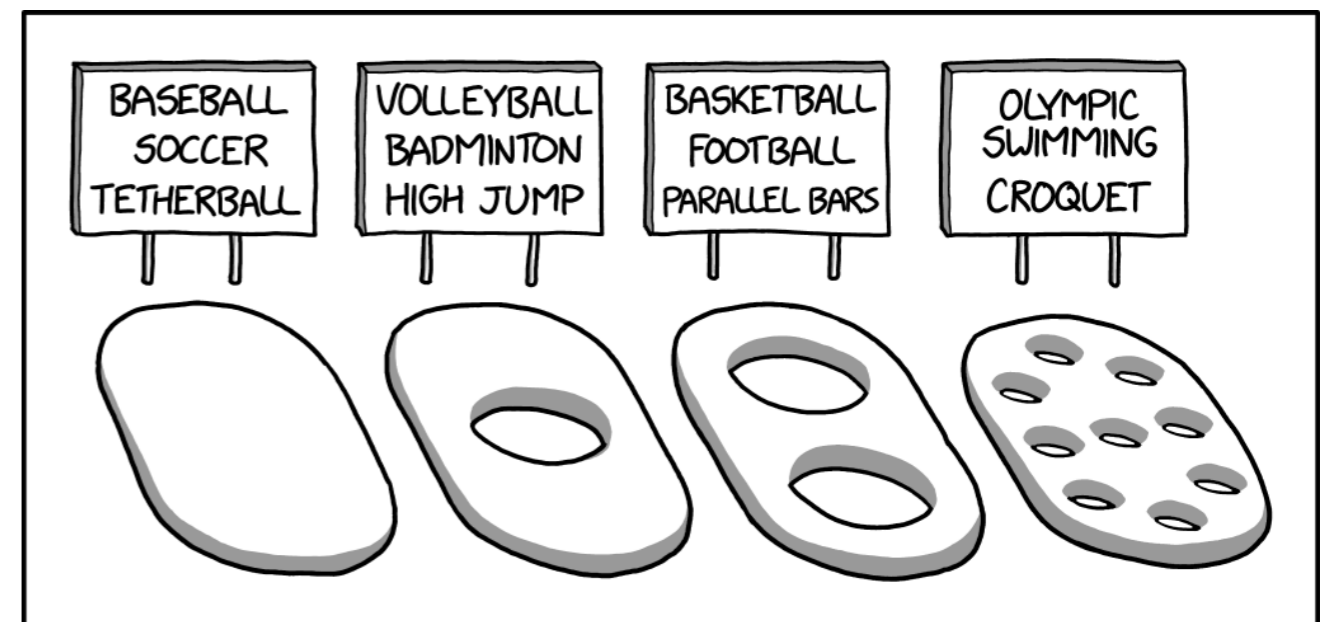

On Sunday, June 26th we will go hiking in the Franconian Switzerland again. Meeting point is at 8:45 am at Erlangen main station, the train to Nuremberg leaves at 9:02 am. Our hike will lead us from Etzelwang to Hersbruck (it is possible to leave earlier after about 15 km). At noon we will have a picnic - bring something to eat, enough to drink and maybe a blanket. Don't forget your semester ticket or 9€ ticket and sturdy shoes. We are looking forward to hiking with you!

## FSI-Sommerfest

In a way, the FSI-Summerfest is like Lord Voldemort. For years it was thought dead, now it's back. It always makes an appearance just before the summer holidays. And its followers (the FSIs) wear black uniforms. This year the summer party will start on **Tuesday, 05.07** from 6pm at the Physikum. Your physical well-being will be taken care of with a variety of grilled delicacies and both alcoholic and non-alcoholic drinks. Of course, our Prof-DJs will once again contribute to peace of mind and entertainment. We will again be supported by the Geosciences FSI, which will be running the cocktail bar at the festival.

## How to reach us?

Do you have any questions about your studies? Do you want to know more about us or our events? Or do you even want to join the FSI? Then you can reach out to us either by email (see below) or via one of our other channels. You can find the dates of our online meetings and consultation hours on the website. We are looking forward to meeting you!

NO ONE EVER WANTS TO USE THE TOPOLOGY DEPARTMENT'S ATHLETIC FIELDS.
