

# Toiletpaper

In those days, an email was sent throughout the entire student body to enter them into the examination lists (21.11 - 11.12). At that time, Dr. Joachim Hornegger was President of FAU. Everyone went to their examination office to get registered, because they were all overwhelmed with Campo. So Josef went off too, because he was a student of materials science with a focus on wood processing... Wasn't it something like that? That your studies don't go to your head the same way, we have put together a few dates and events that might sweeten the coming Advent season a little.

## FSI Winterfest

Jingle bell, jingle bell, jingle bell rock. And our departments? They rock too! On Tuesday, 13 December, the long-awaited winterfest of the FSIs Maths/Physics/DS and Chemistry MoWi will return. From 6pm onwards, we welcome you to enjoy food, drink and mulled wine at the Physics and Biology lecture halls (Physikum/Biologigikum). And of course, our ProfDJs will once again take care of your acoustic welfare.

## General assembly of all physics students

The general assembly of all physics students will take place on December 19th, 2022. We start by presenting at which points in our department students have a say and where our opinions in committees, organs or assemblies are represented. This includes topics such as examination regulations, study grants or which professors should be appointed to FAU. In addition, you can ask the many professors and responsible persons present about everything that concerns your studies or the situation at the department. From exam registration to a semester abroad to BAföG applications or the process of various lab courses, there is no topic that cannot be discussed here! You can also express your opinions on some topics in a broad forum of students and the department administration. The General Assembly is therefore an important, democratic institution and it would be nice if as many of you came as possible!

## Colloquia and christmas lectures

If you want to get a glimpse of what current research can be about, you might be interested in colloquia. There, various external and internal researchers give short talks about their field of research. The audience is composed of other professors and students throughout all semesters. Upcoming presentations of interest are:

11th of Nov, 2pm, H12	GRK-Kolloquium, Opening Colloquium of 2nd funding period
15th of Nov, 4.30pm, H13	Symmetries of Computational Problems
23rd of Nov, 12pm, HH	Of safety belts and shock absorbers: how nature creates high-end materials
30th of Nov, 12pm, HH	Neural networks for optics and optics for neural networks
6th of Dez, 4.30pm, H13	How to measure a quantum field: New developments in mathematical quantum field theory
7th of Dez, 12pm, HH	Dual Comb Spectroscopy for Electronic Fingerprinting
14th of Dez, 12pm, HH	Das Stern-Gerlach Experiment – ein Meilenstein der Physikgeschichte
20th of Dez, 4.30pm, H13	Nodal Surfaces and Coding Theory

In addition there will be the christmas lectures of the three departments. The physics lecture will be at the 15th of Dezember. The lecture date for mathematics and data science will be published by the department in the following weeks.

## Regulars' table for physics teaching students

"Physics is actually far too difficult for physicists." (David Hilbert) To escape the far too heavy physics for one evening, we invite you to our regulars' table for physics teaching students, short Platsch (german abbreviation)! We will meet at Gambrinus on 18th of Nov at 6pm and hope that physics won't find us there. Whether it's your first time or you've attended in the past, we look forward to seeing you! Please sign up at the [fsv.tf/platsch](https://fsv.tf/platsch) (qr-code on the right) if you can come.

## Game nights and movie nights

In winter, when the days get shorter and it gets colder at night than outside, people retreat to their homes and devote themselves to more domestic hobbies. How about a fun board game or a cosy movie? Fortunately, we are already prepared for both. Our next game nights are planned for Thursday 24 November, Tuesday 6 December and Thursday 22 December. You are cordially invited to the mathematics exercise rooms from 6pm. We will also be ordering pizza together. If you are more interested in film evenings, please take a note of Thursday 17 November for the next lecture hall movie night and Thursday 1 December for the ETG's annual performance of "Die Feuerzangenbowle".

## How to reach us?

Do you have any questions about studying? Would you like to learn more about us or our events? Or do you even want to join the FSI? Then you can contact us either by mail (see below) or in person: We have weekly service hours, which are on Tuesdays 12-13 in the Math FSI room under H11 and on Wednesdays 14-15 in the Physics FSI room under HF or you just can knock on the door if someone's there. Our meetings are from Oct the 12th on every Wednesday at 6 pm – in even calendar weeks in the physics FSI room, in odd weeks at the mathematics FSI room. We are looking forward to seeing you!

HOW TO ANNOY SCIENTISTS: REFER TO ALL HYPOTHESES AS "FAN THEORIES"
