

# Toiletpaper

W

hat a wonderful time in which Mandelbrot and plum pudding taste sweet rather than dry, in which nuts not only need to be cracked but also nibbled on and in which shivering from the cold rather than from exam anxiety is still necessary. Well, the latter is not so desirable either, but it is certainly bearable in the right company and with the right events. With this in mind, we have once again put together a fine selection of tasty event cookies.

## The Doctoral Students' Convention

The Doctoral Students' Convention (ProKo) advocates for the interests of FAU's doctoral students. Each year, two representatives from all registered doctoral students are elected at each faculty. The 10 elected doctoral students together form the Doctoral Students' Convention of FAU. ProKo organizes networking events for doctoral students several times a year, including a monthly get-together. While you have to wait for ProKo's next visit to the Christkindlesmarkt, they invite you to join them for a collective mulled wine session **on Friday, December 15th in front of HH**. For more events and information, feel free to check ProKo's blog or Instagram channel.

## Old Protocols

Once again, Christmas is around the corner, and once again, you've left gift shopping too late. To avoid this in your exam preparation, start looking for past exams for your upcoming exam phase. With an extensive collection of memory protocols from past oral exams, we are happy to help you get a more reliable impression of the questions you might face. Just send us an email specifying which exams you'd like protocols for, and we'll send you suitable ones. As a small favor, we hope that you will, in turn, document your own experiences for future generations and contribute to expanding our collection.

## Other Interesting Dates

But before we let upcoming exams spoil our evenings too much, here are some noteworthy events in the coming weeks:

- Dec 16th, 11 am, HG** Modern Physics on Saturday Morning – "Quantum Electronics – but electric now"
- Dec 18th, 6 pm, HG** FSI Auditorium Cinema
- Dec 19th, 12 pm, Zoom** QuCoLiMa Talk – Nonlinear Interrogation of Quantum Materials
- Dec 19th, 4.30 pm, H11/Ü4** Christmas Lecture - Mathematics/DS Department
- Dec 20th, 7 pm, Ü4** FSI Karaoke Night

Additionally, the FSI is already planning more game nights on Tuesday, Jan 09, Thursday, Jan 18, and Monday, Jan 29. The next UFUF lecture series in mathematics is also scheduled for Tuesday, Jan 23.

## Physicists in the Workforce

On **Tuesday, January 16th**, you have the opportunity to gain insight into the professional world beyond the university with two lectures from the series "Physicists in the Workforce." The time, venue, and topics of the event will soon be announced on posters and the FSI website.

## FSI Evaluation

Last summer, you were asked to evaluate FSI Math/Physics/DS in various lectures. In the spirit of transparency, we want to present you with a selection of the results. Discussing the evaluation is meaningful since 80% of respondents obtain information about us through toilet paper and posters. Your interest in written old exams (and somewhat more reservedly in old scripts) hopefully provides a good basis when we address this issue with your professors.

In addition to difficulties in theoretical physics and issues with module catalogs and Campo, we were also informed about overlaps in lectures and individual problems due to illnesses. This illustrates the variety of problems with which you can come to us to find a solution together. We were praised for our wide range of activities but also pointed out outdated toilet papers and websites, which we aim to improve. Since the survey, we have given more attention to the maintenance of the social room, hopefully with positive results. Finally, we appreciate your numerous suggestions for new activities. If you have more questions about the evaluation, you can continue reading here on how to reach us.

## How to Reach Us

Do you have any more questions about your studies? Do you want to know more about us or our activities? Or do you even want to join FSI? Then you can reach us either by email ([fsi-mathe-physik-ds@fau.de](mailto:fsi-mathe-physik-ds@fau.de)) or in person: Our office hours are **Tuesdays, 1-2 pm** in the Math FSI room and **Thursdays, 11.30 am-12.30 pm** in the Physics FSI room. Our meetings are held **every Wednesday** at 6 pm – in even calendar weeks in the **Physics FSI room** and in odd ones in the **Math FSI room**. We look forward to seeing you!
